The Family Medicine Residency at Metro Health Hospital provides clinical experiences in its outpatient office at Metro Health Breton. This office features 15 exam rooms, 2 procedure rooms and an array of equipment for clinical procedures. Family Medicine residents average 100 patient visits per month.

We teach more than 30 outpatient procedures at Metro Health Breton Family Medicine including nasolaryngoscopy, dermatological procedures, colposcopy, cryosurgery, fracture care, and osteopathic manipulative treatment. As a resident, you will have the opportunity to learn how to manage health care for an entire family, even in the most complex cases. The residency program maintains its own inpatient service dedicated to teaching residents how family physicians work efficiently in the hospital.

Specialty rotations at Metro Health Hospital are offered with more than 60 specialists who provide training in areas such as cardiology, pulmonology, rheumatology, allergy and immunology, and sports medicine.

In addition to our Statewide Campus System affiliation through MSU, we are also affiliated with the Grand Rapids Medical Education and Research Center for Health Professions (GR-MERC), which offers our residents the opportunity to do rotations at other hospitals in the Grand Rapids area. Research is strongly encouraged, and our residents have won awards for the work they have done in clinical research.

All Family Medicine residents establish a profile of patients that they follow throughout the three years of their residency.
