

Who Are We?

Metro Health hospitalists are highly qualified medical professionals who are on site, providing the best possible care for patients while they're in our facility. Referring physicians and patients can depend on our team for:

- Patient-focused, compassionate care
- Commitment to quality
- Experience and efficiency
- Collaborative approach
- Timely communication
- Immediate feedback to primary care physicians

What is a Hospitalist?

A Key Partner in Your Care.

If you're admitted to Metro Health Hospital, you may be seen by one of our hospitalists. These experienced doctors play a key role, assisting your primary care physician by leading the team that provides your care while you are in the hospital. They are available around the clock and have special knowledge of hospital systems to ensure high-quality, highly efficient care. They are there to answer your questions, talk to your family and communicate with your personal physician to ensure continuity of care after you've left the hospital.

Key Partners in Patient Care

Metro Health Hospitalists... Experience you can trust.

Quality Care

Doctors who send their patients to Metro Health Hospital can rest assured they're in good hands with our excellent team of experienced hospitalists. On duty around the clock, these internal medicine physicians are extremely familiar with the hospital environment and well equipped to handle a wide variety of acute illnesses.

Collaboration

As medical care in a hospital setting becomes increasingly sophisticated, Metro Health's high standards for quality and efficiency are further enhanced by

our hospitalists program. These doctors have special expertise in hospital care that makes them uniquely qualified to lead a multidisciplinary team—ensuring the best possible outcomes for our patients. Every day, they are on the scene coordinating care with nurses, therapists, social workers, case managers, residents and medical specialists.

Communication

Primary care physicians can count on Metro Health hospitalists to keep them well informed. They will provide timely follow-up and encourage patients to return to their personal physician after their hospitalization. Being in the hospital on a daily basis also allows them to maintain close communication with patients, families and other caregivers on their team.
